

SPECIAL OFFER DIAMOND SAWS SHARPEN BY LASER ABLATION TECHNOLOGY

Noise reduction of **3-5 decibels** thanks to notches compensating and appropriately selected soundproofing cuts.

Increased tool life, thanks to innovative laser ablation sharpening technology.

Easy to install on the machine thanks double-sided chamfered main hole.

Continuous operation without sharpening for up to several months, and thus **optimization of working time.**

Diamond plate and steel from **renowned manufacturers**, translate into **high quality of processed surfaces.**
